

WORKFORCE OS ENTERPRISE

Corporate Roles, Operational Governance & Comprehensive Leave Policy Manual

Version: 2.0 | Effective Date: August 16, 2026 | Scope: Global Enterprise & Vendors

1. Executive Summary & Governance Scope

This Policy Document establishes mandatory operational guidelines, system security standards, role definitions, and employee/vendor leave management policies governing all operations within **Workforce OS**. This framework ensures complete regulatory compliance, data privacy, operational transparency, and standardized personnel management across enterprise entities and third-party contractor agencies.

Applicability: This policy binds all of the following stakeholders:

- **System Administrators:** Master personnel overseeing enterprise platform operations.
- **Client Companies:** Enterprise client organizations registered within the platform.
- **Direct Employees:** Full-time and part-time internal staff employed directly by client companies.
- **Vendor Agencies:** Third-party staffing, consulting, and contractor agencies.
- **Vendor Contractors / Employees:** External consultants assigned to client projects via registered vendor agencies.

2. System Roles & Role-Based Access Control (RBAC)

Workforce OS enforces strict Multi-Tenant Role-Based Access Control (RBAC). User privileges are automatically scoped to tenant boundaries based on five primary role designations:

- 1. System Administrator (admin):** Global oversight role. Has unrestricted access across all client companies, vendor agencies, user profiles, and system audit logs. Authorizes data resets, system seeding, and global registrations.
- 2. Company Admin (company):** Administrative head of an enterprise company. Manages internal company details, registers direct employees, assigns contracted vendor agencies, and views company analytics.
- 3. Company Employee (employee):** Internal staff member. Has access to personal profile settings, departmental directory, colleague organization charts, and personal leave requests.
- 4. Vendor Company Admin (vendor.company):** Executive manager of a third-party vendor agency. Registers external contractors/consultants, views client contract assignments, and manages agency details.
- 5. Vendor Employee / Contractor (vendor.employee):** External contractor assigned to client initiatives. Has access to personal contractor profile, assigned client company info, and contractor task records.

Role Permission Matrix:

System Feature / Action	Admin	Company	Employee	Vendor Admin	Vendor Staff
Create / Edit Companies	Full	None	None	None	None
Manage Internal Employees	Full	Own Org	View Dept	None	None
Register Vendor Agencies	Full	Own Org	None	None	None
Assign Vendor to Client	Full	Own Contracts	None	View Contracts	None
Manage Vendor Contractors	Full	View Assigned	None	Own Agency	Self Profile
View Platform Analytics	Global	Own Org	None	Agency Stats	None
Reset Database Seed Data	Allowed	Denied	Denied	Denied	Denied

3. Company & Vendor Governance Rules

A. Client Company Registration Rules:

- Every company must possess a unique legal identifier code (e.g. COMP-APEX, COMP-NEXUS).
- Corporate contact details (valid official email domain and telephone number) are mandatory prior to active status approval.
- Deactivation of a company automatically restricts platform access for all associated employees.

B. Vendor Agency Onboarding & Service Categorization:

- Vendor agencies must register with explicit service type tags (e.g. *IT Staffing, Management Consulting, Cloud Infrastructure, Legal Compliance*).
- Vendor agency codes must follow the VEND-XXXX format to ensure automated billing and log routing.

C. Vendor-to-Company Contract Binding Rules:

- A vendor agency can only deploy contractors to a client company after an official **Contract Assignment** is linked between the entities.
- Client companies maintain full authority to terminate vendor agency assignments upon 30-day written notice.

4. Employee & Contractor Workforce Policy

A. Direct Internal Employee Rules:

- Full-time internal employees are assigned to a primary Department (e.g., *Engineering, Product, Operations, HR*).
- Passwords must adhere to standard security requirements (minimum 6 characters, regular quarterly updates enforced).

B. External Vendor Contractor Rules:

- All vendor contractors must sign Non-Disclosure Agreements (NDAs) and Intellectual Property (IP) Transfer agreements prior to system access.
- Contractor accounts must be linked to a valid Vendor Agency ID. Independent un-attached contractor accounts are strictly prohibited.

5. Comprehensive Leave & Time-Off Policy

Workforce OS provides a structured time-off policy designed to promote work-life balance while ensuring operational continuity. Leave entitlements depend on employment type and tenure.

Leave Category	Annual Quota	Eligible Roles	Carry-Forward	Encashment
Privilege Leave (PL / Annual)	21 Days	Direct Employees	Max 10 Days	Allowed on Exit
Casual & Sick Leave (CL/SL)	12 Days	Direct Employees	Lapses Year-End	Not Allowed
Maternity Leave	26 Weeks	Female Employees	N/A	Paid Fully
Paternity Leave	15 Days	Male Employees	N/A	Paid Fully
Bereavement Leave	5 Days	All Personnel	N/A	Paid Fully
Vendor Contractor Leave	As per Agency	Vendor Contractors	Agency Terms	Agency Terms
Loss of Pay (LOP)	Uncapped*	All Personnel	N/A	Unpaid

Detailed Leave Guidelines & Procedures:

1. Privilege Leave (PL) / Annual Vacation:

- **Accrual Rate:** Employees earn 1.75 days of PL per completed calendar month of service.
- **Notice Requirement:** Planned vacation exceeding 3 consecutive days requires manager approval at least **10 business days** in advance.
- **Maximum Accumulation:** Employees can carry forward a maximum of 10 PL days into the subsequent calendar year. Excess unused balance lapses.

2. Sick Leave (SL) & Casual Leave (CL):

- **Allocated at 1 day per month** (total 12 days annually).
- **Medical Documentation:** Consecutive sick leave exceeding **2 business days** mandates submission of a certified doctor's medical certificate.

3. Vendor Contractor Time-Off Rules:

- Vendor Contractors are governed primarily by their parent Vendor Agency employment terms.
- **Dual Notice Mandate:** Contractors taking planned leave must notify BOTH their Vendor Agency Manager AND their assigned Client Enterprise Project Lead at least **5 business days** prior.
- **Billing Adjustments:** Client companies are not billed for contractor unworked days under Time & Materials (T&M;) contract terms.

6. System Security, Data Protection & Audit

- **HttpOnly Cookie Security:** Authentication tokens (JWT) are stored strictly inside encrypted HttpOnly and SameSite=Lax browser cookies to prevent XSS script theft.
- **Multi-Tenant Data Isolation:** Data queries strictly scope records by company_id or vendor_company_id to prevent cross-tenant data leaks.
- **Audit Trail Logging:** All security actions (login attempts, user creation, vendor assignments, seed resets) are recorded in server logs with client IP, timestamp, and duration.

POLICY GOVERNANCE NOTICE: Workforce OS Management reserves the right to amend, update, or modify these operational guidelines and leave structures. All changes will be published in official system updates and communicated to company administrators.
